In September 2009, we welcomed the first group of students into the post-BA PhD program. We have no data yet for time to complete this program, but we anticipate that post-BA students will take approximately one year longer to graduate than post-MA students (those entering the program with a completed master's degree).

Program Costs

Description	2015-2016 1st-year Cohort Cost
Tuition for full-time students (in-state)	\$11,864.40
Tuition for full-time students (out-of-state)	\$25,191.28
Tuition per credit hour for part-time students (<i>if applicable enter amount; if not applicable enter "NA"</i>)	NA
University/institution fees or costs	\$1,136.88
Additional estimated fees or costs to students (e.g. books, travel, etc.)	\$1,000.00

The vast majority of PhD students are fully funded for their years on campus through a combination of in-department and out-of-department assistantships and fellowships. Graduate assistantships and fellowships pay a monthly stipend, carry a full tuition waiver, and provide an excellent benefits package. For details, [see the department funding page](#). Students on assistantship or fellowship are responsible for university segregated fees and additional costs (such as textbooks). Estimates of these fees are found on the last two rows of the table.

Licensure

Outcome	2006 to 2016
The total number of program graduates (doctoral degrees conferred on transcript) between 2 and 10 years ago	57
The number of these graduates (between 2 and 10 years ago) who became licensed psychologists in the past 10 years	40
Licensure percentage	70%

The Commission on Accreditation encourages programs to provide additional information to assist the public (including prospective students) to interpret the overall licensure rate. One consideration is that 25-35% of our graduates typically accept academic or research positions after attaining the Ph.D. It is important to recognize that psychologists working in academia, or as researchers, do not have the same need to obtain licensure as those in primarily practice positions. Thus, it may be useful to examine licensure data separately by work setting, as follows:

Licensure Rates By Work Setting

Primary Work Role	N	N Licensed (%)
Non-clinical (e.g., academic, research, public policy)	15	4 (26%)
Clinical	42	36 (85%)
Total	57	40 (70%)
